SAFE AND SECURE UPDATES

What is Modino?

What is Modino?

Modino is on-prem & private cloud solution which main goal is to provide software and security updates for IoT devices in a "safe" and "secure" way.

"Safe" because, with over 15+ years of experience in cryptography, we end-to-end encrypt the update process, and "secure" because even if the update on the target device fails, the device will never remain switched off / out of the network.

We keep an eye for the security of your devices while reducing its downtime to almost zero, assuring you the trust and eliminating the costs and stress of recovery.

What is “Modino Partner Program”?

What is “Modino Partner Program”?

A place where you can have a direct impact on how our innovation will be shaped. We looking forward for your experiences and domain expertise to pursue the innovation together, to create the product tailored to users needs. Your needs.

With your feedback we can grow faster and in a more tailored way. Creating intuitive solutions that can be easily integrated into your environment.

Let us know about your needs and pain points, so we can find a solution for those. Nothing is impossible – even if it seems that way.

Benefits of joining the program

Benefits of joining the program

You will help shape the future of Modino.io in a way, that you can benefit from the most.

You will get a sneak peek into new solutions. To make sure they are matching your needs and solving the pain points.

Your voice will be heard and may affect our roadmap. Nothing makes us as happy, as satisfied clients.

How it works?

How it works?

Usually it is about 1-2 hours of activities in a month, such as:

- Usability tests
- In-depth interviews
- Surveys
- Initial designs consultations
- Participation in workshops

How to join?

How to join?

- Sign the agreement [we need to prepare the legal, this might take a while]
- Wait for an invite
- It's up to you how much time you would like to invest
- You can also resign at any time
- Participation in the programme is free of charge
